

# Animal homes

## Background knowledge

Animals can be found living in almost any place on Earth. The place where an animal normally lives is called its *habitat*. There are many different kinds of habitats, such as in grass, under the ground, in trees, in ponds or rivers, on the seashore, and in the ocean.

## Science activity

Where would these animals normally live? Draw a line between each animal and its habitat.

Pond

Ocean

Worm  
Water snail  
Stickleback  
Centipede  
Crab  
Frog

Rabbit  
Mackerel  
Millipede  
Butterfly  
Starfish

Woodpecker

Soil

Woodland

## Science investigation

Create a poster about one type of habitat. Include the plants and animals that live in the habitat. What type of habitat is it? What is the source of food and shelter for the animals?

# Animal homes

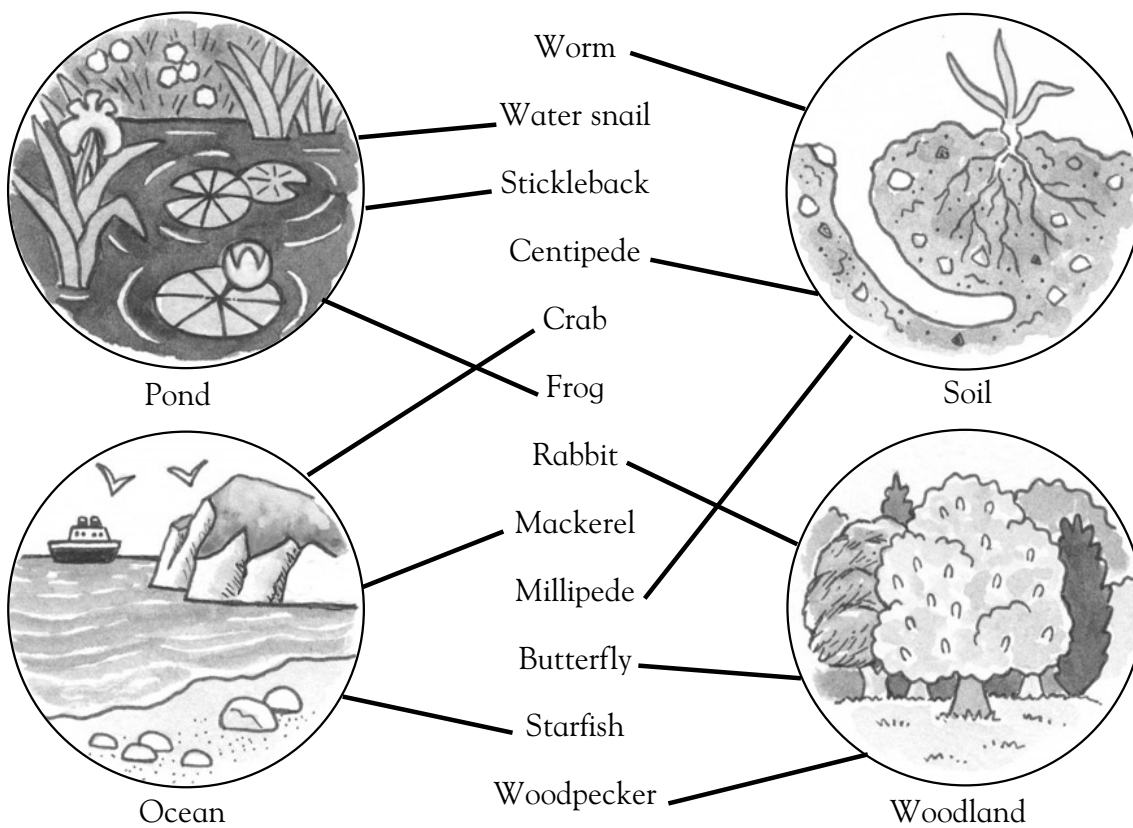

## Background knowledge

Animals can be found living in almost any place on Earth. The place where an animal normally lives is called its *habitat*. There are many different kinds of habitats, such as in grass, under the ground, in trees, in ponds or rivers, on the seashore, and in the ocean.

## Science activity

Where would these animals normally live? Draw a line between each animal and its habitat.

## Science investigation

Lines in the activity could also be drawn from the soil-dwellers to the woodland. Aquariums and terrariums are great examples for habitat study.
